SALES & CONDITIONS

HEALTH

All cattle will be accompanied by proper health certificates for immediate shipment.

EPDS & VALUES

The American Angus Association is calculating and updating EPD's on a weekly basis. EPD information is current at time of printing and any new data submitted between the print date and sale date could affect individual EPD's. If your purchase decision is heavily dependent on EPD's, please refer to www.angus.org for the latest information. Any changes will be noted on sale day supplemental sheet. Catalog EPD's are as of 4.9.21.

TERMS

Cattle sell under the suggested Terms and Conditions of the American Angus Association. www.angus.org/Pub/suggested_sale_terms.pdf.

HERD HEALTH

Routine herd health and vaccinations up to date on all animals. Bulls and Heifers ear notched and tested negative for PI-BVD. All bulls have passed a Breeding Soundness Exam performed by Dr. Chris Sumner.

GUARANTEE

All cattle sell satisfaction guaranteed. All bulls are guaranteed for one year provided he has been properly cared for. Buyer is entitled to credit or replacement.

DELIVERY

We offer free delivery. If you pick up your purchase, deduct \$75 off the purchase price.

BULL DEVELOPMENT

All bulls were weaned in early May and placed on fescue paddocks after weaning. They were shipped in early June to Wardensville, WV and tested using the Growsafe systems there. They returned home in mid-October. Ultrasound and yearling weights were taken in October. After collecting yearling information, bulls were placed on a maintenance ration of hay and silage. 30 days prior to sale, bulls were supplemented with a commodity pellet. Every effort has been made to ensure bulls are sound and healthy. We feel our development allows the bulls to be best prepared for the upcoming breeding season.

GENETIC ABNORMALITIES

The American Angus Association has identified genetic abnormalities and all potential carriers in our sale have been tested and identified. As carriers, they are not affected by the defect, but could have an affected calf if bred to another carrier. For additional information, refer to www.angus.org. Please ask if you have any questions.

WELCOME

Friends,

On Saturday, April 24, 2021, we will host our 6th "Focus Now, Value Later" bull and female sale. Our mission is to create value for our customers through reliable genetics and focused customer service while maintaining a viable and enjoyable family farm for generations. For 61 years, we have been working to create better cattle. Creating cattle that can adapt and thrive because that is what our customers have asked for.

In 2015, we had 60 heifer calves born at Lazy Acres and the bred cows in this sale represent the ones that thrived. They calved as a two-year old and have delivered a calf every year. They remain problem free. They are pregnant and ready to do it again with many of the bred heifers and bulls in this offering a result of their labor. These females have been the building blocks for our next generation and now you have the opportunity to make them yours.

Everyone has faced challenges over the past 12 months. Several of those challenges were ones never imagined possible, but through those challenges came many new opportunities. Opportunities to evaluate and focus on the things that matter. We would not exist without you and truly appreciate your interest in our program. We stand behind the cattle we are offering and are confident these bulls and females will work for you. If you have questions about the cattle before or after the sale, please let us know.

God Bless you and yours.

Sincerely,

Steve Furrow

CALVING EASE DIRECT (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BIRTH WEIGHT EPD (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WEANING WEIGHT EPD (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

YEARLING WEIGHT EPD (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

SCROTAL CIRCUMFERENCE EPD (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

DOCILITY (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

CALVING EASE MATERNAL EPD (CEM), is expressed as a predictor of how easily a sire's daughters will calve.

MILK EPD (MILK), is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

CARCASS WEIGHT EPD (CW), expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

MARBLING EPD (MARB), expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RIBEYE AREA EPD (REA), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

FAT THICKNESS EPD (FAT), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

MATERNAL WEANED CALF VALUE (\$M), an index, expressed in dollar per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

WEANED CALF VALUE (\$W), an index, expressed in dollars per head, to predict profitability differences in progeny due to genetics from birth to weaning. The underlying objective being producers will retain 20% of the female progeny as replacements and sell the rest of the cull females and their male counterparts as feeder calves. Traits included are as follows (in no particular order): birth weight, weaning weight, milk, and mature cow weight.

BEEF VALUE (\$B), an index value expressed in dollars per head, is the expected average difference in future progeny performance for postweaning and carcass value compared to progeny of other sires.

COMBINED VALUE (\$C), an index, that is the combination of \$Maternal and \$Beef.
